Changes to read-only views

This chapter lists changes to the read-only views since Red Box 2.10. Use this chapter to check if you need to make changes to your programs that take input from read-only views.

New read-only views

There are 44 new read-only views of two types:

- i) 21 Normal records
- ii) 23 Join-views presenting parts of a record and a subordinate.

Normal Records

Changed read-only views

Four existing views have changed their name :-

CM_DEFAULTS_RO	becomes	CM_APPLICATION_DEFAULTS_RO
RFC_MODEL_NAME_RO		RFC_MODEL_RO
RFC_STATUS_RO		CM_STATUS_RO
RFC_STATUS_TYPE_RO		CM_STATUS_TYPE_RO

One view has been made redundant :-

UPGRADE_ISSUE_RO

Many of the read-only views have new fields. Many more records can be logically deleted and the database handler code has improved its tracking of changes, this leads to the following fields being added to many record types:

AMENDED_BY
 ID_AMENDED_BY
 AMENDED_ON
 CREATED_BY
 ID_CREATED_BY
 CREATED_ON
 DELETION_DATE
 DELETION_REASON
 ID_DELETION_REASON
 OBSOLETE

In addition, a series of ‘Custom’ fields have been added to a significant number of records.

There are two levels of Custom Fields, a full set of 33 on 14 Record Types (marked * below), and a smaller set of 16 on an additional 8 Records (sub-records).

Table 1.1 Custom fields

DATE 1	LOOKUP 1	STRING 1
DATE 2	LOOKUP 2	STRING 2
DATE 3	LOOKUP 3	STRING 3
DATE 4 *	LOOKUP 4 *	STRING 4
DATE 5 *	LOOKUP 5 *	STRING 5 *

DECIMAL 3	LOOKUP 9 *	
DECIMAL 4 *	LOOKUP 10 *	LONG STRING *
INTERVAL 1 *	NUMBER 1	
	NUMBER 2	
	NUMBER 3	
	NUMBER 4 *	

These are available on the following record types:

Table 1.2 Custom field record types

DOCUMENT_RO *	SERVICE_RO *
DOCUMENT_COPY_RO *	SERVICE_EVENT_RO
EQUIPMENT_RO *	SOFTWARE_RO *
ERROR_REPORT_RO	USER/DEPARTMENT_RO *

Of course, by the time these fields are pressed into service they will be re-labelled for on-line use. The Read-only view can continue to refer to the field by its generic name or the re-generation utility can be used to embed the new field names in the views if preferred.

The following table provides information about changes to read-only views, including the record fields they contain and their type and length.

The first column is used to indicate

- '-' Removed fields
- '+' New fields
- '<' Field changing name (followed immediately by)
- '>' New name of field above.
